

Yannich Thay Carlos

Bragança, Portugal | yannich6thay@gmail.com | linkedin.com/in/yannich-thay | github.com/Y6THAY | yannich.6thay.workers.dev

PROFESSIONAL SUMMARY

Electrotechnical and Computer Engineering student @ UPB with a background in Computer Science. Dedicated and detail-oriented, specializing in Network Security, Threat Defense, and Vulnerability Assessment. Focused on building robust systems, identifying risks, and strengthening digital infrastructure. Certified by Google in Cybersecurity Professional concepts, with hands-on experience in Python, Linux, SQL, SIEM tools, and malware detection. Currently working step-by-step toward a career in security architecture, eager to apply analytical skills and technical training to a dynamic cybersecurity role.

EDUCATION

Universidade Politécnica de Bragança (UPB) <i>Electrotechnical & Computer Engineering Student</i>	Bragança, Portugal Sept. 2026 – Present
ISUTC - Instituto Superior de Transportes e Comunicações <i>Bachelor of Science in Computer Science</i>	Maputo, Moçambique Feb. 2025 – Sept. 2026
Escola Secundária da ISCTEM (ESI) <i>High School</i>	Maputo, Moçambique 2023 – 2024

EXPERIENCE

Programming Fundamentals Teaching Assistant / Monitor <i>ISUTC - Instituto Superior de Transportes e Comunicações</i>	Mar. 2026 – June 2026 Maputo, Moçambique
- Assisted students during lab sessions and practical classes, clarifying doubts on programming logic, control structures (if/else, loops), variables, and data types. - Collaborated with professors to identify common learning challenges and reinforced explanations of complex topics. - Fostered a collaborative learning environment by encouraging critical thinking and independent problem-solving (debugging) skills. - Reviewed and provided constructive feedback on coding exercises, helping students adopt best practices and coding standards from the start.	

PROJECTS

Network Traffic Analyzer & Live Cyber Dashboard <i>Python, Scapy, Rich, Threading, TUI</i>	2026
- Engineered an asynchronous, thread-safe network traffic analyzer and mini-NIDS using Scapy and Rich to perform real-time packet sniffing, protocol mix parsing, and host volume analytics. - Built a dynamic 4 FPS TUI dashboard with live threat detection watchlists for high dynamic port connections (> 1024) and automatic IP privacy masking for public broadcasting. - Implemented explicit thread locking (threading.Lock) and non-blocking capture logging with automated CSV forensic exports for digital investigations and auditing.	
Multi-Threaded TCP Port Scanner & Banner Grabber <i>Python, Socket, Concurrent.futures, Regex</i>	2026
- Developed a fast, zero-dependency multi-threaded TCP network scanner using pure Python standard libraries (socket, concurrent.futures) for rapid port discovery. - Implemented service banner grabbing to interrogate open ports and extract initial software welcome headers, service types, and version information. - Integrated foolproof Regex (re) input validation for IPv4 target ranges and built-in export modules for structured CSV and plain-text forensic reporting.	

CERTIFICATIONS

Google Cybersecurity Professional Certificate: Google (Aug. 2024)
Automate Cybersecurity Tasks with Python: Google (Aug. 2024)
Assets, Threats, and Vulnerabilities: Google (July 2024)
Sound the Alarm: Detection and Response: Google (July 2024)
Connect and Protect: Networks and Network Security: Google (Jan. 2024)
Play It Safe: Manage Security Risks: Google (Jan. 2024)
Foundations of Cybersecurity: Google (Jan. 2024)
Tools of the Trade: Linux and SQL: Google (Jan. 2024)
English Upper-Intermediate (B2.1): Università di Napoli Federico II (June 2026)

TECHNICAL SKILLS & LANGUAGES

Security Domains: Threat Analysis, Vulnerability Assessment, Network Reconnaissance, Threat Management, Malware Detection, SIEM, Segurança de rede, Segurança de TIC

Programming & Databases: Python, SQL, Java, Bash

Operating Systems: Linux, Windows

Tools & Frameworks: Intrusion Detection Systems (IDS), Scapy, Rich TUI, Socket Programming, Git, VS Code

Languages: Portuguese (Native/Bilingual), English (Professional Working), Spanish (Elementary)
